1 Introduction

This report demonstrates basic LaTeX document preparation, including sections, mathematical expressions, tables, figures and cross-references.

2 Mathematical Typesetting

The quadratic equation is

$$ax^2 + bx + c = 0. \tag{1}$$

Its solutions are

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}.$$

A matrix can be typeset as

$$A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}.$$

3 Tables

Table 1 presents sample values.

Table 1: Sample experimental values

Trial	Input	Output
1	2	4
2	3	9
3	4	16

4 Figures

Figure 1 demonstrates a caption and label.

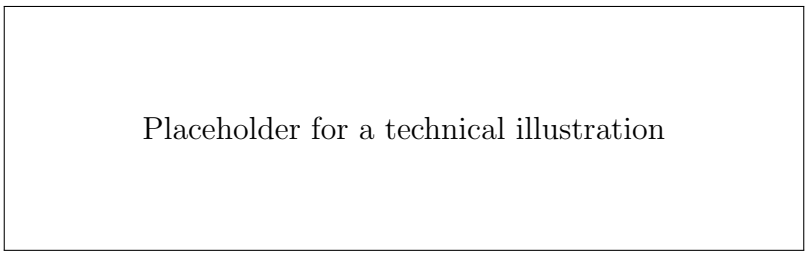

Figure 1: A framed placeholder figure

5 Cross-References

Equation 1 gives the quadratic form. The data are listed in Table 1, and the illustration appears in Figure 1.

6 Conclusion

This small document demonstrates common LaTeX structures used in technical reports.
